

BlueCount Manager

The full web solution

WWW.BLUEEYEVVIDEO.COM

A simple and functional interface

View and analyse activity in your store using a standard web browser from any PC on the network.

Access a rich visual ergonomic interface, presenting all the relevant indicators of your sites.

The precision and immediacy of customer traffic data provides a valuable decision-making tool.

Measure the activity of your establishments

Data from Blue Eye Video sensors is aggregated by BlueCount Manager and presented as customisable dashboards, graphs and reports on:

- Entrances and exits
- Number of customers by zone
- Number of people in queues
- Queue waiting time

Compare performance – improve results

You can compare your indicators according to:

- Time:

By year, month, day, hour... even by every five minutes.

- Location:

By store, zone, entrance or feature.

The comparison tools allow analysis of customer activity and flow so that you may react to improve customer experience and performance.

Nonstop information

Data is updated from all sites every five minutes, so activity statements are always current. Export data to third party systems via standard protocols.

Blue Eye Video makes a commitment

We guarantee the confidentiality and the integrity of your data.

Web Browser

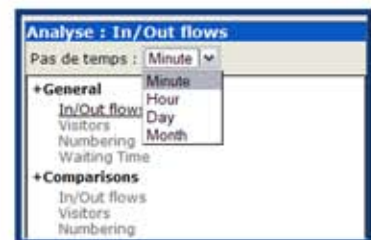

A designed solution for all web browsers

Counting Data

Waiting time, people in Q, entrances: we measure your activity data

A functional system

Choose the data you want

An easy customization

Choose the display mode you need
